**TERSELY TOLD.**  
Dr. R. G. Buckner left yesterday for Florida and Andalusia. He will return tomorrow.  
H. R. Smith, circulation manager of The Journal, returned last night from a business trip to Chipley.

The friends of Frank C. Jeudevine, who has been ill for several weeks, will be pleased to learn that he is much improved.  
Rev. and Mrs. O. A. Stone and family spent yesterday in the city, being en route to Perdido, where Mr. Stone has purchased a summer home and will spend the summer months there.

A small fire occurred yesterday afternoon on East Hill near the home of Mr. Kohler. The blaze did not result in much damage to the house and was extinguished without the assistance of the fire department.  
Sixteen defendants were before Mayor Bliss in the police court yesterday morning for trial. Of this number two defendants were discharged, four cases continued, one case not prosecuted, one defendant given sixty days on the streets, two given time on the rock pile and one turned over to the county authorities. Fines imposed amounted to \$34.

The boat excursion given Monday night by the members of the Navajo, a newly organized social club, was a most successful event, and one of the most largely attended and enjoyable of the season. Every comfort was afforded those who made the trip to the life saving station, and everyone spent a most enjoyable evening.

## EX-DEPUTY CIRCUIT CLERK B. H. BURTON UNDER ARREST

**Taken Into Custody at an Early Hour this Morning Upon the Charge of Falsifying Records, Forging Names to Documents and Appropriation Public Money to His Own Use.**

### RESULT OF AN INVESTIGATION

**By State Auditor Into the Accounts and Records of Office.**

**PRISONER WHEN INTERVIEWED BY THE JOURNAL ADMITTED WRONG-DOING IN CERTAIN INSTANCES, BUT EXPECTED RESITUATION WOULD PREVENT PROCEEDINGS AGAINST HIM—MEETING OF COMMISSIONERS.**

A sensation was created at 1 o'clock this morning, when Sheriff Van Pelt placed in jail B. H. Burton, who, up to a few months since, held the position of deputy clerk of the circuit court. Mr. Burton is charged with having falsified the records of the clerk, forged names to documents and collected money which he appropriated to his own use. It is alleged that the amount will reach in the neighborhood of \$5,000.

The arrest was the result of an investigation by the state auditor, who has been going over the books of the county clerk for the past three weeks. He came here for the purpose of probing into various matters which had been called to his attention, but it was not generally known that the office of the clerk of the circuit court was the place where the work was being done. This, however, was the case, and yesterday at noon a warrant was issued from the office of Judge Landrum. This charged Mr. Burton with having falsified the records of the circuit clerk, and also with having received and retained certain moneys from warrants issued from that office.

The arrest of Mr. Burton, which occurred this morning at 1 o'clock came as a shock to his friends in Pensacola. The sheriff, accompanied by Constable Bobe went to his home at that hour and placed him under arrest. The scene was most pathetic, one of the daughters of the arrested man fainting, and others going into hysterics. Physicians were called, and it was nearly 2 o'clock before the sheriff and his prisoner reached the county jail. A Journal reporter interviewed Mr. Burton this morning at the jail. Mr. Burton stated that he had but little to say. He was aware of the fact that the state auditor was investigating the records of the office, but he did not anticipate that action would be taken at so early a date. He stated that he had done wrong in certain instances, however, but expected that when the money was made good that there would be no further proceedings.

While the full facts could not be obtained last night, it was understood that Mr. Burton had forged the names of parties to warrants and other legal documents, and instead of turning it into the proper parties, placed it in his own pocket. This was discovered some months ago, and was the cause of his discharge from the office of the clerk, where he had served for a number of years. About the first discovery was that of a tax deed where it is alleged, he forged the name of the clerk. Later other matters of a similar character came up, causing the investigation to be inaugurated.

The County Commissioners held a lengthy session yesterday and last night. The sessions, however, were all executive, and no one but the commissioners themselves were allowed and the state auditor were present. The body convened at 5 o'clock in the afternoon, and with the exception of an adjournment for supper remained closed until about 11 o'clock. The meeting presumably was upon the case of Mr. Burton. Afterwards an adjournment was taken until 6 o'clock this evening.

Smith, Chicago; D. W. Burke, DeFuniak Springs; C. R. Barrineau, Quintette. W. A. Mudge, of Muscogee, was in the city yesterday, having come in to attend the meeting of the Rebecca lodge Monday night. He returned home last night.

Everybody is satisfied when the ice cream is flavored with Blue Ribbon Lemon or Vanilla Extract. Ask your grocer for Blue Ribbon Lemon and Vanilla. Takes less. Flavors perfectly.

### POLICE CAPTAIN ACCEPTED BRIBES

**PITTSBURG OFFICIAL RECOMMENDED TO MERCY OF THE COURT BY JURY.**

By Associated Press. Pittsburgh, June 13.—Police Captain Jas. Wilson, of Allegheny, accused of accepting bribes in connection with illegal houses, was found guilty to-day, but the jury recommended him to the mercy of the court. This was Captain Wilson's third trial. The jury disagreed at the first trial and he was acquitted on the second. The prosecution of Captain Wilson was conducted under the auspices of the "Anti-Graft League," which several months ago was instrumental in the arrest of 182 persons in Allegheny.

The convicted man's attorneys will ask for a new trial.

Cures croup, sore throat, pulmonary troubles—Monarch over pain of every sort. Dr. Thomas' Electric Oil.

**The Greatest Yet**

### MEN ARE POWERLESS

**To Fight Against Disease Unless They Strike at the Underlying Cause.**

To treat dandruff and falling hair with irritants or oils on the scalp, a parasitic germ will prosper, is like scooping water from the ocean to prevent the tide from rising.

You cannot accomplish a satisfactory cure without having a right understanding of the fundamental causes of the trouble.

You must kill the dandruff germ. Newbro's Herpicide does this because it is specially made to do that very thing.

When the germ is removed, the hair has no choice but to resume healthy growth and beauty.

"Destroy the cause, you remove the effect."

Sold by W. A. D'Alemberte, druggist and apothecary, 121 South Palafox St., Pensacola, Fla. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

### HOW CORKS ARE CUT

**TURNING THE PLIABLE BARK INTO BOTTLE STOPPERS.**

Keen Machine Knives That Shape, Turn, Shave and Taper the Slabs Stripped From the Tree—The Way the Waste Product is Utilized.

Cork, as most persons know, is the outer bark of an evergreen oak tree which grows in Spain, Portugal, Algeria, Morocco and to some extent in Italy. Its peculiar properties, especially its lightness and its compressibility, make it valuable for scores of purposes, but its original use, in the manufacture of corks, or stoppers for bottles, still consumes the greater part of all that is brought to market.

The cork oak varies in diameter from six inches to three feet. By a generous provision of nature the tree may be periodically stripped of its outer bark without losing its life.

Twenty years is the usual age at which the first cutting is made. After that the cork may be harvested about every ten years. The first cut, which is called virgin bark, is of little value, as it is coarse in texture and deeply seamed. The tree may be expected to live and yield cork until it is 150 years old.

In Spain and some other European countries corks are still made by hand, each one being pared from a square block by a common knife. In this country, where are made the finest corks in the world, the work is done by machinery, all of which is of American invention and manufacture. Every boy who has ever whittled a cork for a fishing bob or a penguin pellet knows how difficult the material is to cut smoothly. To do it well his knife must be as sharp as a razor and must be used with a drawing motion, not a mere pressure, and if the cork be wet so much the better. The same difficulties confront the manufacturer by machinery and are met in the same way.

The bark, after having been wet and then allowed to remain for a time in damp cellars to soften, goes first to the stripping machines, which reduce it to slabs of a size proportionate to the corks to be made. These machines are merely small iron tables, through which appear very thin steel disks, like circular saws, except that they have no teeth. They are really keen edged steel knives, as thin as paper and running at a high rate of speed, but so smoothly that they seem to the spectator to be standing still.

The little slabs or strips of cork go next to the "blockers." The cutters here are cylindrical steel punches, or tubes, with razor edges. They are arranged in rows, or "gangs," and instead of being simply pressed through the cork are also revolving at high speed and so cut their way through.

Having perforated the slab, the cutters back away automatically, while plungers like pistons working in the cylinders come forward and punch out the corks, which for some purposes are already finished corks.

They are, of course, perfectly cylindrical—that is, without taper—and in that form they are preferred by bottlers of effervescent liquids, because their shape enables them the better to resist the pressure of the restrained gases.

But for the use of druggists, who are the great users of corks and need the very finest, a tapering stopper is preferred, and this necessitates another operation. The tapering machines are run mostly by young women. Each machine consists of a little lathe, which centers the cylindrical cork automatically and then brings it into contact with the edge of the cutting knife, which, like the cutter of the slicing machine, is a very thin steel disk. As the cork touches this knife a thin shaving rises and curls away, like a puff of smoke.

One who knows nothing of the machinery could see no reason for it, but during the second that the cork has been in contact with the apparently motionless disk some dozen yards of flying, razor edged steel have been at work, and the cork is now a perfect truncated cone, with a fine satin-like surface and an even and regular taper. By hand a very rapid and skillful cutter can turn out twelve or fourteen gross in a day. With these machines one girl will produce 420 gross.

There are few businesses in which the quantity of waste material is so large as in the manufacture of corks. In the best managed factories it ranges from 60 to 70 per cent, but American ingenuity and industrial development have succeeded in transforming it into a source of profit. By grinding the waste to various degrees of fineness and pressing it with glue or shellac into various shapes it is made useful for the inner soles of shoes, for bathroom mats, for insulation in refrigerating plants and the deadening of sound in apartment houses, the making of bicycle handles and the grips of tennis rackets, fly rods and golf clubs, and there are dozens of other uses for the waste which are quite as interesting.

Some years ago one manufacturer of corks was paying a teamster a dollar a load to cart away his waste and dump it on a refuse heap. Today he receives \$69 a ton for the very cheapest quality of this waste.—Edward Williston Prentiss in Youth's Companion.

**How an Engineer Saved a Child's Life**

Special Correspondence.  
From Wichita, Kansas.  
Mr. Joseph Tack, living at 423 W. 2nd Street, this city, one of the oldest and best known engineers in the State of Kansas, tells an interesting story in which he saved the life of Mary, the beautiful child of section foreman Wade Roy. Mary was sweet company for her mother, and she always ran with smiling and joyful glee to meet her father as he came from work, and her happy disposition banished any cares or worries that he may have had.

For two months little Mary lay at the point of death. The family physician had called in consultation three of the most skilled of his professional brothers. These good doctors did all in their power, with not a spark of improvement in Mary's condition. They lost all hope, and told the mother that her little darling could not live.

**The Rescue as Told by the Engineer**

A year ago I was troubled so with my stomach I thought I had cancer. One Sunday afternoon I had such pain I could hardly stand it. I was at Wichita, where we had three hours' lay over before going to Salina. I went to Arch McVicar's drug store, and asked for a dose of Bromo Soda. He said that would only help for a few minutes and recommended Kodol Dyspepsia Cure for a permanent cure. I bought a bottle and had immediate relief. I took four bottles and am cured entirely.

I have run a locomotive engine for twenty-eight years, twenty-five of that time on passenger, where we only have twenty minutes for meals. That is what ruins railroad men's stomachs; that is why I thought it my duty to tell you about this medicine, so that my brothers could be relieved in case of trouble of this kind.

I have been a B. L. E. for twenty-seven years; run on Mo. P. R. R. twenty years; am known nearly all over Kansas. About a year ago, now, our section foreman, Wade Roy, from Ruella, told me his little girl had cholera infantum, and was given up by three doctors. While I lay at Kiowa I bought a new bottle of Kodol Dyspepsia Cure, and while sitting in the coach I read a testimonial where children had been cured by taking twenty drops when doctors had given them up, so I poured half of my new bottle in the old one, and when I got back to Ruella, I stopped the engine in front of the section house and gave him the bottle and told him to read the circular and use his own judgment, that the medicine had cured me. Next morning he was at Anthony smiling and said the child was better from the first dose. In two weeks she was up and running around, and a more grateful family was never seen. With best wishes I remain, JOS. TACK, Engineer Mo. P. R. R., 423 W. 2nd St., Wichita, Kansas.

## Kodol DYSPEPSIA CURE

**Digests What You Eat**

**Relieves instantly and cures permanently Indigestion, Dyspepsia, Sour Stomach, Weak Stomach, Gas on Stomach, Belching, Puffed Stomach, Catarrh of the Stomach and all Stomach Troubles that are curable.**

Dollar bottle holds 2 1/2 times as much as the trial, or 50 cent size.

Prepared at the Laboratory of E. O. Dewitt & Co., Chicago, U. S. A.
